# CHAPTER 1

## INTRODUCTION

1.1	Basic statistics . . . . .	4
1.2	Change history . . . . .	5

## 1.1 Basic statistics

The number of problems is 18629.

Number of problems solved and verified is 16889 [90.660%].

Number of problems failed to solve is 1740 [9.340%].

## 1.2 Change history

Table 1.1: Change history

date/time	summary of changes	number problems	not solved	solved but not verified
Friday Jan 3, 2025. 11PM	Solved more problems from Introductory Course On Differential Equations by Daniel A Murray. Longmans Green and Co. NY. 1924	18,629	1054 5.658%	NA
Tuesday Dec 31, 2024. 2PM	Added PDF legal size to all the book solutions in addition to the current PDF letter size.	18,548	1050 5.661%	NA
Saturday Dec 28, 2024. 2AM	Finished Solving problems from Elementary Differential Equations. By Thornton C. Fry. D Van Nostrand. NY. First Edition (1929). Finished solving problems from "A short course on differential equations. By Donald Francis Campbell. Maxmillan company. London. 1907" Solving problems from Introductory Course On Differential Equations by Daniel A Murray. Longmans Green and Co. NY. 1924	18,524	1050 5.668%	NA
Friday Dec 20, 2024. 10PM	Solving problems from Elementary Differential Equations. By Thornton C. Fry. D Van Nostrand. NY. First Edition (1929)	18,227	1046 5.739%	NA
Thursday Dec 19, 2024. 11PM	Added new solver for second order, which tries to reverse the role of the independent and dependent variables in case all other methods failed. This resulted in 7 ode's being solved now which were not solved before. Added two tables to show reverse the role for first and second order. improved solving for explicit solution from implicit. Finished solving all problems from DIFFERENTIAL EQUATIONS WITH APPLICATIONS AND HISTORICAL NOTES by George F. Simmons. 3rd edition. 2017. CRC press, Boca Raton FL. Finished solving problems from Elementary Differential Equations. By R.L.E. Schwarzenberger. Chapman and Hall. London. First Edition (1969) FULL BUILD	18,206	1044 5.734%	NA

Continued on next page

Table1.1 – Change history. Continued from previous page

Monday Dec 16, 2024. 9PM	<p>Added new solver for first order, which tries to reverse the role of the independent and dependent variables in case all other methods failed.</p> <p>This resulted in 20 more odes solved now. Need to do the same for second and higher order.</p> <p>Solving problems from new book: DIFFERENTIAL EQUATIONS WITH APPLICATIONS AND HISTORICAL NOTES by George F. Simmons. 3rd edition. 2017. CRC press, Boca Raton FL.</p>	17,884	1046 5.848%	NA
Wed Dec 11, 2024. 4AM	<p>Added time varying support for second order ode when solving using Laplace method. This resulted in 7 more problems now solved.</p> <p>Added new field in DB which is the book solution from the back of the textbook if it is available. This is now used to check my solution against first before using odetest. If validating against book solution works, then done, else use odetest to verify the solution. Most of the odes that do not correctly verify with odetest uses laplace method with dirac delta in the RHS.</p>	17,731	1066 6.012%	NA
Tuesday Dec 10, 2024. 10PM	<p>Added 14 of my own problems solving Laplace with variable coefficients for first order ode in my own misc. odes book as there was none in the textbooks I am using to illustrate this method.</p> <p>Removed assumption of positive when taking the inverse laplace transform as this makes dirac(t) become zero and solution then will not validate.</p> <p>Do not convert to piecewise of solution to Laplace ode, if this results in invalid verification. This resulted in 2 problems now verifying ok.</p> <p>I need now to start adding time varying support for second order ode with Laplace method as it now only does constant coefficients.</p>	17,731	1081 6.097%	NA
Continued on next page				

Table1.1 – Change history. Continued from previous page

Sunday Dec 8, 2024. 11PM	<p>Added support to solving first order ode using Laplace transform for time varying ode. Only polynomial coefficients of the independent variable are supported. See my ode algorithms page for details.</p> <p>Still need to do the same for second order ode.</p> <p>Add check in the laplace transform solver for ode to verify the solution. This was missing for some reason. This resulted is few ode's using Laplace not verified, but the solution looks correct. It is very hard to get verification on solution from Laplace method. Even Maple's own solution using method Laplace, some of them do not validated using odetest even though solution looks correct.</p> <p>Added separate tables for Laplace for varying coefficients and constant coefficients to make it easier to lookup.</p>	17,717	1083 6.113%	NA
Sunday Dec 1, 2024. 11PM	<p>For higher order ode's, I still do not implement reduction of order. So all these are failed. Changed the code to solve without reduction of order in this case until I get to implement reduction of order for higher order ode's. This resulted in few ode's now counted as solved. There was not many. Only 6 ode's. Rebuild.</p>	17,717	1071 6.045%	NA
Sat Nov 30, 2024. 5PM	<p>Finally, added support to solving shifted Euler. These are second order ode of form <math>(x - a)^2 y'' + (x - a)y' + y = f(x)</math> which are first solved by change of variable <math>X = x - a</math> to convert to standard Euler. The shift <math>a</math> must be the same in both coefficients. See my ode algorithm page for examples.</p> <p>Completed solving all problems from book Differential equations for engineers by Wei-Chau XIE, Cambridge Press 2010.</p> <p>Completed more problems from Differential equations and their applications, 4th ed., M. Braun.</p> <p>FULL BUILD.</p>	17,717	1077 6.079%	NA
Continued on next page				

Table1.1 – Change history. Continued from previous page

Wed Nov 27, 2024. 1AM	<p>Finished solving Differential equations. An introduction to modern methods and applications. James Brannan, William E. Boyce. Third edition. Wiley 2015 The non-linear system of ode's, I left out for now, since I do not know these well. May in the future will add them.</p> <p>Added new table for linear system of ode's solved using Laplace method.</p> <p>Solved about 190 problems from book V.V. Stepanov, A course of differential equations (in Russian), GIFML. Moscow (1958)</p> <p>Fixed detection of Euler ode for higher order ode, by also normalizing the ode and checking again.</p> <p>Also, for second order ode's, added check if particular solution using variation of parameters leads to very complicated and very large result, then keep the integral as inert (unevaluated). This resulted in number of odes now being verified OK when before they could not be validated. Also the answers are now more clear, even though the integrals are not resolved.</p> <p>Solved more problems from book Differential equations for engineers by Wei-Chau XIE, Cambridge Press 2010. Still have more to solve from this book.</p> <p>Added missing latex, which I had there but overlooked adding, to solving Euler ode for second order. Also improved handling of basis function for Euler solver. This did not affect result, but is more accurate.</p>	17,556	1064 6.061%	NA
Tuesday Nov 19, 2024. 7PM	<p>Solved more problems from Differential equations. An introduction to modern methods and applications. James Brannan, William E. Boyce. Third edition. Wiley 2015</p> <p>Fixed HTML link problem in lookup tables. Now link point to correct problems.</p>	17,149	1078 6.286%	NA
Friday Nov 15, 2024. 5AM	<p>Added new solver for reduced riccati ode. Updated my ode algorithms page for description. This is much shorter way to solving the reduced riccati <math>y' = ax^n + by^2</math> where <math>a, b, n</math> are constants.</p> <p>Solved more problems from Differential equations. An introduction to modern methods and applications. James Brannan, William E. Boyce. Third edition. Wiley 2015</p>	16,815	1066 6.339%	NA

Continued on next page

Table1.1 – Change history. Continued from previous page

Tuesday Nov 12, 2024. 3AM	<p>Added phase line diagram to all problems of type first order autonomous ode <math>y' = f(y)</math>. Made new ode type first_order_ode_autonomous and kept first_order_ode_quadrature for ode of form <math>y' = f(x)</math> only. i.e. split the quadrature to two types now. This is because <math>y' = f(x)</math> is not autonomous. Note that ode of type <math>y' = f(x, y)</math> are not quadrature, and fall into other types such as linear or separable and so forth.</p> <p>The phase line diagram detects stable (sink), unstable (source) and semi-stable (node) type of equilibrium points. Made it vertical line instead of horizontal line.</p> <p>I still need to make improvements to this diagram, will do that next build.</p> <p>Corrected entry for Kamke 110 ode where I was missing a term.</p>	16,789	1066 6.349%	NA
Sat Nov 9, 2024. 2AM	Solved more problems from Differential equations. An introduction to modern methods and applications. James Brannan, William E. Boyce. Third edition. Wiley 2015	16,789	1066 6.349%	NA
Thursday Nov 8, 2024. 1AM	<p>Corrected problem that made Maple trace output not show.</p> <p>Solved rest of problems from book Theory and solutions of Ordinary Differential equations, Donald Greenspan, 1960.</p> <p>Started solving problems from Differential equations. An introduction to modern methods and applications. James Brannan, William E. Boyce. Third edition. Wiley 2015</p>	16,744	1066 6.366%	NA
Monday Nov 4, 2024. 1PM	<p>Added summary of solutions at end of each solver run.</p> <p>Added to each book, a lookup table as first section.</p> <p>Completed solving all problems in book Differential equations and linear algebra, Stephen W. Goode and Scott A Annin. Fourth edition, 2015.</p> <p>Completed all problems from book Differential equations, 3rd edition by Shepley Ross. Full build.</p>	16,639	1062 6.383%	NA
Tuesday OCT 29, 2024. 11PM	<p>Finished solving all problems from Differential equations and their applications, 4th ed., M. Braun.</p> <p>Full build.</p>	16,461	1045 6.348%	NA

Continued on next page

Table1.1 – Change history. Continued from previous page

Sunday OCT 26, 2024. 2PM	Fixed problem in riccati solver. Removed few problems not meant to be in DB. Added handling for dAlembert when ode of form $y = g(p)$ when $g(p)$ is such it can not be solved for $p$ . i.e. form ode is not the normal $y = xf(p) + g(p)$ . But for this to apply, $g(p)$ must be not solvable for $p$ , otherwise other methods apply. Full build.	16,205	1042 6.436%	NA
Sunday OCT 20, 2024. 1PM	Solved problems from book Elementary Differential Equations. By C. Henry Edwards, David E. Penney and David Calvis. 6th edition. 2008 number of small internal fixes. I still need to add these: add support for reduction of order for third order odes and add support for solving using Laplace method for variable coefficients odes. There are few problems like this in the above book which my solver could not now solve. Currently Laplace solver only can handle constant coefficient linear odes. Hopefully by next week will have these finished. Fixed few problems in database that I have typed incorrectly from the textbooks by hand. Full build.	16,207	1057 6.522%	NA
Continued on next page				

Table1.1 – Change history. Continued from previous page

Sunday OCT 6, 2024. 11PM	<p>Spend last 4 months working full time to rewrite the whole internal workflow between solvers. This is to simplify the logic as it was just getting too complicated as it was.</p> <p>That is why I have not added more text book solutions.</p> <p>Now only solution which are verified are given. Hence no need to run verification phase afterwards as before, as verification is done by solver itself and solver will only return solutions that are verified. Hence the solved but not verified column in this table is no longer applicable.</p> <p>Fixed number of small bugs in the process. Now the number of unsolved odes is reduced.</p> <p>Kept the default to solve same ODE in as many different ways as detected.</p> <p>Improved Abel and Chini solvers. Much work still is needed to improve the Latex steps and show steps for solving for initial conditions as now I do not show these steps. Build now takes about a whole week to complete including compiling the Latex. Need to find me a faster PC as this is just too slow.</p> <p>Full build.</p>	15,568	1032 6.628%	NA
Tuesday Sept 14, 2024. 10PM	Full build to clean a bug in detecting Bessel ode which causes some solution to be solved as Bessel ode when it was not.	15,568	1170 7.52%	N/A
Sunday June 30, 2024. 10PM	Full build to set the colors on the plot as before I use command line and that does not support colors. Also fixed two ode which had typos.	15,568	979 6.28%	42 0.269%
Monday June 23, 2024. 10PM	Full build.	15,568	980 6.30%	45 0.289%
Monday June 3, 2024. 11PM	Improved integration using <code>smart_int()</code> and fixed checking for implicit solution in some places. This resulted on 6 more ode's solved now and one more verified than last build.	15,569	981 6.301%	40 0.257%
Sat. June 1, 2024. 3AM	Full build. Improved quadrature solver for first order to better handle IC.	15,569	987 6.339%	41 0.263%
Monday. May 20, 2024. 1PM	Fixed bug in quadrature first order. There was case it was not veifying the solution satisfies the ode.	15,569	994 6.361%	40 0.256%
Thursday. May 16, 2024. 2PM	Solved more problems.	15,569	990 6.360%	40 0.256%
Continued on next page				

Table1.1 – Change history. Continued from previous page

Monday. May 13, 2024. 1PM	Solved more problems.	15,564	990 6.361%	40 0.257%
Sat. May 11, 2024. 11PM	Solved more problems.	15,532	987 6.354%	40 0.257%
Thursday. May 8, 2024. 3PM	Added Maple step by step solution also for some problems. Fixed bug in verification of solution with IC. I had 8 solutions verified correct when they are actually not. Fixed bug where the check for dAlembert was giving true in some cases when it was not. Added check that for dAlembert and clairaut ode, the $y'$ is not linear. I was missing this check even though it works without this check, but this leads to solving the ode using dAlembert or clairaut when other methods exists. Solved more problems. Full rebuild.	15,474	969 6.262%	40 0.257%
Wed. April 24, 2024. 6PM	Solved more problems.	15,222	953 6.261%	32 0.210%
Tuesday. April 23, 2024. 7PM	Solved more problems.	15,140	951 6.28%	32 0.211%
Tuesday. April 16, 2024. 9PM	Solved more problems.	15,003	951 6.338%	29 0.193%
Friday. April 11, 2024. 11PM	Solved more problems.	14,813	950 6.413%	29 0.195%
Monday April 8, 2024. 11PM	Improved Latex. Solved more problems.	14,572	948 6.506%	29 0.199%
Thu. April 4, 2024. 3AM	Rerun Maple again over all problems, added simplify(). Added latex showing steps to the new solvers : <code>first_order_nonlinear_p_but_separable</code> and <code>first_order_nonlinear_p_but_linear_in_x_y</code>	14,408	948 6.579%	31 0.215%
Friday March 29, 2024. 4PM	Solved more problems from INTRODUCTORY DIFFERENTIAL EQUATIONS. Martha L. Abell, James P. Braselton. Fourth edition 2014. EIScAe. 2014. Added two new solvers, but need to add steps (latex) yet. <code>first_order_nonlinear_p_but_separable</code> and <code>first_order_nonlinear_p_but_linear_in_x_y</code> See my ode algorithms report on main page for details. Full build.	14,315	941 6.574%	31 0.216%

Continued on next page

Table1.1 – Change history. Continued from previous page

Sunday March 17, 2024. 3PM	Solved more problems from INTRODUCTORY DIFFERENTIAL EQUATIONS. Martha L. Abell, James P. Braselton. Fourth edition 2014. ElScAe. 2014. Full build on Maple 2024	14,090	939 6.664%	32 0.227%
Sunday March 10, 2024. 3PM	Solved more problems from INTRODUCTORY DIFFERENTIAL EQUATIONS. Martha L. Abell, James P. Braselton. Fourth edition 2014. ElScAe. 2014. Switched to Maple 2024.	14,000	933 6.664%	33 0.236%
Thursday March 7, 2024. 11PM	Full build. Fixed constants of integration so they are reset for each problem correctly.	13,876	941 6.775%	33 0.244%
Sunday March 3, 2024. 10PM	Solved more problems from INTRODUCTORY DIFFERENTIAL EQUATIONS. Martha L. Abell, James P. Braselton. Fourth edition 2014. ElScAe. 2014.	13,876	940 6.774%	34 0.245%
Saturday March 2, 2024. 8PM	Solving problems from new book INTRODUCTORY DIFFERENTIAL EQUATIONS. Martha L. Abell, James P. Braselton. Fourth edition 2014. ElScAe. 2014. Fixed few entries in database from last build.	13745	940 6.839%	32 0.233%
Wed Feb 28, 2024. 9PM	Solved all problems from Differential Equations by Alfred L. Nelson, Karl W. Folley, Max Coral. 3rd ed. DC heath. Boston. 1964	13724	942 6.864%	38 0.277%
Monday Feb 26, 2024. 11PM	Solved more problems from Differential Equations by Alfred L. Nelson, Karl W. Folley, Max Coral. 3rd ed. DC heath. Boston. 1964	13416	939 6.999%	36 0.268%
Friday Feb 23, 2024. 10PM	Finished solving all problems from Ordinary Differential Equations. An introduction to the fundamentals. Kenneth B. Howell. second edition. CRC Press. FL, USA. 2020	13215	936 7.083%	34 0.257%
Tuesday Feb 20, 2024. 11PM	Added support for solving higher order ode's with missing $y$ . Also improved handling of constant of integrations by automatically generating them instead of hard-coding.	13000	934 7.192%	28 0.215%
Monday Feb 19, 2024. 9PM	Solved more problems from Ordinary Differential Equations. An introduction to the fundamentals. Kenneth B. Howell. second edition. CRC Press. FL, USA. 2020	13000	960 7.385%	28 0.215%
Friday Feb 15, 2024. 8PM	Solved more problems from Ordinary Differential Equations. An introduction to the fundamentals. Kenneth B. Howell. second edition. CRC Press. FL, USA. 2020	12900	960 7.442%	28 0.217%

Table1.1 – Change history. Continued from previous page

Thu Feb 15, 2024. 10PM	Solved more problems from Ordinary Differential Equations. An introduction to the fundamentals. Kenneth B. Howell. second edition. CRC Press. FL, USA. 2020	12611	954 7.565%	28 0.222%
Wed Feb 14, 2024. 9PM	Finished solving all problems from Schaums Outline. Theory and problems of Differential Equations, 1st edition. Frank Ayres. McGraw Hill 1952. Solving problems from Ordinary Differential Equations. An introduction to the fundamentals. Kenneth B. Howell. second edition. CRC Press. FL, USA. 2020	12495	954 7.635%	28 0.224%
Tue Feb 13, 2024. 9PM	Full build. Fixed factoring of ode.	12390	951 7.675%	28 0.226%
Tue Feb 6, 2024. 10PM	Solved more problems from Schaums Outline. Theory and problems of Differential Equations, 1st edition. Frank Ayres. McGraw Hill 1952.	12390	957 7.724%	30 0.242%
Sunday Jan 28, 2024. 11PM	Full build. Solved problems from Schaums Outline. Theory and problems of Differential Equations, 1st edition. Frank Ayres. McGraw Hill 1952.	12371	951 7.687%	30 0.245%
Sunday Jan 28, 2024. 11PM	Full build, solved more problems. Improved second order handling of transformation on $y$ to make ODE constant coefficient (method 1)	12166	952 7.825%	31 0.254%
Sunday Jan 7, 2024. 11PM	Full build	12081	927 7.673%	30 0.248%
Thu Jan 4, 2024. 2PM	Fixed quadature handling of tricky IC. Also improved homog. solver IC. Solving for IC is turning out to be the hardest of solvers actually. I need to rewrite all of this one day.	12081	922 7.673%	30 0.248%
Monday Jan 1, 2024. 3PM	Solved more problems. Full build for Mathematica to fix Latex	12081	927 7.673%	33 0.273%
Thursday Dec 28, 2023. 9PM	Rewrote laplace solver for first and second order to better handle mixed IC not all at same point or at zero. Full Build.	11,946	872 7.299%	32 0.268%
Wed Dec 25, 2023. 10PM	Solved more problems. Worked on IC handling for first order. Still need more work.	11,946	875 7.325%	31 0.2595%
Wed Dec 20, 2023. 1PM	Full build. Started working on adding existence and uniqueness analysis for linear and non-linear second order ode. But not finished.	11,897	842 7.089%	30 0.252%
Sunday Dec 17, 2023. 1PM	Added existence and uniqueness analysis for linear and non-linear first order ode.	11,897	843 7.089%	29 0.2437%

Table1.1 – Change history. Continued from previous page

WED Dec 6, 2023. 2PM	Finished solving problems from DIFFERENTIAL EQUATIONS by Paul Blanchard, Robert L. Devaney, Glen R. Hall. 4th edition. Brooks/Cole. Boston, USA. 2012	11,897	843 7.089%	29 0.237%
Sunday Dec 3, 2023. 3PM	Solved more problems from DIFFERENTIAL EQUATIONS by Paul Blanchard, Robert L. Devaney, Glen R. Hall. 4th edition. Brooks/Cole. Boston, USA. 2012	11,878	843 7.09%	29 0.244%
Sunday Dec 3, 2023. 3PM	If first order ode is quadrature, do not attempt to solve it using other types. I still do not handle IC well on some problems. need to fix those, this is why I had 4 problems now not verify. Full build.	11,719	843 7.18%	29 0.247%
Friday Dec 1, 2023. 3PM	Just bug fixes and table improvements.	11,719	852 7.27%	25 0.213%
Wed Nov 26, 2023. 10PM	Added new solver for second order to handle special case of $Ay'' + By' + Cy = 0$ where it can reduce the order by one. Added support for special linear system and added 3 problems to test it.	11,719	855 7.32%	26 0.222%
Sat Nov 25, 2023. 6PM	Fixed bug in separable. There was one case where it could not separate it because I did not use normal().	11,716	858 7.323%	26 0.222%
Friday Nov 24, 2023. 2AM	Fixed bug in Bessel ode solver. Worked more on linear system of equations.	11,716	865 7.383%	26 0.222%
Sat Nov 18, 2023. 7PM	Split solving system of linear ode's summary table into two. One where matrix is defective and one when it is not. This makes it easier to locate problems with defective eigenvalues. Fixed table showing eigenvalues/eigenfunctions problems.	11,716	890 7.596%	26 0.222%
wed Nov 15, 2023. 9PM	Full build. Improved plots. Working on 3rd order ode, variation of parameters.	11,716	893 7.622%	26 0.222%
Sat Nov 11, 2023. 10PM	Added more plots for system of equations. (phase plots and solutions plots) and improved verification of solution to series.	11,716	890 7.596%	29 0.247%
Thursday Nov 9, 2023. 7PM	Added more problems from DIFFERENTIAL EQUATIONS by Paul Blanchard, Robert L. Devaney, Glen R. Hall. 4th edition. Brooks/Cole. Boston, USA. 2012	11,716	896 7.647%	42 0.358%
Tuesday Nov 7, 2023. 9PM	New book added. DIFFERENTIAL EQUATIONS by Paul Blanchard, Robert L. Devaney, Glen R. Hall. 4th edition. Brooks/Cole. Boston, USA. 2012	11,552	896 7.756%	42 0.363%
Sunday Nov 5, 2023. 9PM	More problems added. Full build.	11,491	894 7.78%	42 0.365%

Continued on next page

Table1.1 – Change history. Continued from previous page

Sat Nov 4, 2023. 1PM	More problems added. Full build.	11,434	893 7.81%	37 0.323%
Sunday Oct 29, 2023. 9PM	Full build. Modified separable solver to reject explicit result from integration if 6 times as large as the integrand. This caused speed up and reduced complexity of handling large expressions. It uses now implicit solution instead. I need to find out how many problems this affected.	11,266	887 7.899%	34 0.301%
Thu Oct 19, 2023. 10PM	Add book DIFFERENTIAL and INTEGRAL CALCULUS. VOL I. by N. PISKUNOV. MIR PUBLISHERS, Moscow 1969. Fixed some table display Added book Ordinary Differential Equations by Charles E. Roberts, Jr. CRC Press. 2010 and few problems from Nonlinear Ordinary Differential Equations by D.W.Jordna and P.Smith. 4th edition 1999. Oxford Univ. Press. N	11,228	887 7.899%	35 0.311%
Wed Oct 16, 2023. 9PM	Full rebuild. Added zoom to images.	11,069	882 7.959%	35 0.316%
Wed Oct 12, 2023. 9PM	Rebuild Lie symmetry problems. Improved final simplification. This resulted in one solution now verifying when before it did not. Also added more Latex. Improved exact solver for first order ode. This resulted in few ode's now verifying.	11,069	891 8.04%	27 0.243%
Sat Oct 7, 2023. 10PM	Full build. Fixed some tables.	11,069	891 8.04%	33 0.298%
Thursday Oct 5, 2023. 11PM	Added new book Differential Equations, Linear, Nonlinear, Ordinary, Partial. A.C. King, J.Billingham, S.R.Otto. Cambridge Univ. Press 2003	11,069	894 8.07%	30 0.271%
Monday Oct 2, 2023. 9PM	Added more problems from APPLIED DIFFERENTIAL EQUATIONS The Primary Course by Vladimir A. Dobrushkin. CRC Press 2015.	11,027	893 8.09%	30 0.272%
Sunday Oct 1, 2023. 4PM	Added more problems from APPLIED DIFFERENTIAL EQUATIONS The Primary Course by Vladimir A. Dobrushkin. CRC Press 2015.	10,963	891 8.127%	30 0.273%
Thursday Sept 28, 2023. 10PM	Improve finding Lie symmetry canonical ode for first order. Added more problems from APPLIED DIFFERENTIAL EQUATIONS The Primary Course by Vladimir A. Dobrushkin. CRC Press 2015.	10,936	891 8.14%	30 0.274%

Continued on next page

Table1.1 – Change history. Continued from previous page

Sat Sept 23, 2023. 11PM	Improved Latex for Lie symmetry. Added timelimit on few operations that would hang. Rebuild all first order ode's. Improved table layout to make them more clear by removing column not needed.	10,874	885 8.138%	28 0.257%
Wed Sept 19, 2023. 7PM	Speed up Lie algorithm and some improvements in solving for $\xi, \eta$ . Added latex showing more steps involved. Removed latex showing verification that $\xi, \eta$ keeps ode invariant, as this was long and not needed. I have the steps already given in my main Lie symmetry report at my main site. Added one more book APPLIED DIFFERENTIAL EQUATIONS The Primary Course by Vladimir A. Dobrushkin. CRC Press 2015.	10,874	887 8.157%	28 0.257%
Sat Sept 16, 2023. 10PM	Improved more the Lie symmetry algorithm, the part that finds $S, R$ . See updates flow chart on my Lie symmetry page. Rebuild	10,796	924 8.55%	28 0.259%
Friday Sept 15, 2023. 11PM	Full build. Improved Lie symmetry for first order. See updated algorithm in my study note for Lie on my main page. This resulted in 4 more Lie symmetry ode now to be solved.	10,796	930 8.61%	28 0.259%
Tuesday Sept 12, 2023. 11PM	Added new book AN INTRODUCTION TO ORDINARY DIFFERENTIAL EQUATIONS by JAMES C. ROBINSON. Cambridge University Press 2004	10,796	934 8.65%	28 0.259%
Monday Sept 11, 2023. 5PM	Added more problems from AN INTRODUCTION TO ORDINARY DIFFERENTIAL EQUATIONS by JAMES C. ROBINSON. Cambridge University Press 2004	10,769	934 8.67%	28 0.26%
Sunday Sept 4, 2023. 7PM	Added more problems from new book AN INTRODUCTION TO ORDINARY DIFFERENTIAL EQUATIONS by JAMES C. ROBINSON. Cambridge University Press 2004	10,711	934 8.72%	27 0.25%

Continued on next page

Table1.1 – Change history. Continued from previous page

Sunday Sept 3, 2023. 5PM	Found a problem setting up the canonical ode for Lie symmetry. This is the tricky part where expressions in $x, y$ need to be rewritten for that RHS of the $S'(R)$ is in terms of $R(x, y)$ only. So I fixed that. Hopefully no more problems. This resulted in solving few more problems now. Also fixed the table lookup for Lie's for Bernulli ode. Had wrong sign! Added 50 problems from new book AN INTRODUCTION TO ORDINARY DIFFERENTIAL EQUATIONS by JAMES C. ROBINSON. Cambridge University Press 2004	10,669	935 8.76%	27 0.253%
Friday August 25, 2023. 9PM	Fixed bug in first order homogeneousTypeMapleC solver. No wonder the table was empty. I did not check correctly for nops. Now the table showing these table are filled ok. Fixed and improved Lie symmetry solver for first order. Still more improvements are needed to speed it up.	10,619	946 8.91%	26 0.241%
Friday August 25, 2023. 9PM	Fixed few more problems in Lie symmetry solver for first order. Added check for trivial $\xi, \eta$ found and in this case try again. It is still very slow as I try all possible permutations of polynomials in $x, y$ up to degree 3. Need to improve this part. Finding $\xi, \eta$ is the main obstacle for this method. I also need to implement integrating factor method for Lie symmetry. I found there are short cuts to find there is the first order ode is know. So I am now making table of these, this will speed things alot.	10,619	945 8.9%	31 0.29%
Friday August 11, 2023. 10PM	Minor improvements to Lie symmetry solver for first order ode.	10,619	936 8.81%	33 0.311%
Wed August 9, 2023. 2AM	Have been working on Lie symmetry method. Currently I have it working for first order ode's $y' = f(x, y)$ using polynomial ansatz only. see my notes at <a href="https://12000.org/my_notes/symmetry_in_ode/report.htm">https://12000.org/my_notes/symmetry_in_ode/report.htm</a> . Full BUILD.	10,619	946 8.91%	33 0.311%
Friday July 21, 2023. 1AM	Added tables that show Lie symmetry found by Maple for those ode which has the symmetry. This will be useful when I add solving by Lie symmetry later on, which I am starting to workon.	10,619	1034 9.737%	28 0.264%

Continued on next page

Table1.1 – Change history. Continued from previous page

Tuesday July 18, 2023. 9PM	Added two new first order solvers. One called <code>homogeneousTypeD</code> and the second <code>homogeneousTypeD2</code> . The first implements solver for ode that has form $y' = \frac{y}{x} + g(x)f(\frac{y}{x})$ . This is what Maple calls homogeneous Type D. The second solver is more generic. It tries change of variables $y(x) = u(x)x$ and if this results in ode in $u(x)$ which is either quadrature or separable, then it is used. The above solvers resulted in more than 2 dozen ode's now being solved ! I still need to make these solvers more robust, but the basic setup and latex is now all in.	10,619	1034 9.737%	28 0.264%
Friday July 14, 2023. 7PM	Fixed first order ode to handle better ode's of form $y^n = f(x, y)$ . This resulted in one more ode solved.	10,619	1056 9.97%	28 0.264%
Sunday July 9, 2023. 8PM	Add new second order ode solver called <code>bessel ode form A</code> , which transforms $ay'' + by' + (ce^{rx} - m)y = 0$ to Bessel and solves it. This resulted in few more ode's solved. This uses transformation $x = \ln t$ .	10,619	1057 9.97%	28 0.264%
Wed June 28, 2023. 9PM	Fixed exact solver to allow it to accept integration factor that can't be integrated. This result in few more problem now solved.	10,619	1060 9.98%	28 0.264%
Friday June 23, 2023. 11PM	Rewrote Clairaut and dAlembert ode solvers to improve the latex and flow and speed things up. Simplified things. FULL BUILD. (2 days). Fixed separable yet again to reject <code>RootOf</code> solution and keep implicit.	10,619	1084 10.216%	28 0.264%
Thursday June 8, 2023. 7PM	Full build again to fix plots. Abandon using <code>cmacle.exe</code> as it does not work. bad postscript driver. Also fixed some problems which did not record verify status correctly.	10,590	1091 10.23%	27 0.2549%
Wed May 31, 2023. 11PM	Full build. improved latex, make build faster.	10,590	1090 10.23%	63 0.589%
Wed May 31, 2023. 11PM	Full build	10,590	1090 10.23%	43 0.406%
Thursday May 25, 2023. 7PM	Added option to solve same ode in all possible methods for second order also.	10,590	1089 10.27%	54 0.5099%
Tuesday May 23, 2023. 6PM	Added option to solve same ode in all possible methods. Now for first order ode only, next will add support for second order ode. This makes the book much larger but useful to see same ode solved in different ways. This reduces number of not verified as some methods do verify while other do not.	10,590	1087 10.26%	54 0.5099%

Table1.1 – Change history. Continued from previous page

Friday May 19, 2023. 10AM	Added problems from A First Course in Differential Equations by J. David Logan. Third Edition. Springer-Verlag, NY. 2015 and from Differential Equations by Shepley L. Ross. Third edition. John Willey. New Delhi. 2004	10,590	1086 10.27%	84 0.787%
Sat. May 13, 2023. 9PM	Added solving by Taylor series method for first order and second order. I still need to add support for solving by power series for second order using Balance equation which will take 2-3 more days, then all work on series solver will be done. After that need to add support for solving higher order ode using Taylor series. Will not do power series for higher order ode's. I need to go back working on adding support for finding integration function for nonlinear second order ode which I started looking at few months ago. That is much harder problem.	10,330	1084 10.50%	82 0.794%
Sat. May 6, 2023. 10PM	Started new rewrite of series solver to improve it.	10,330	1084 10.50%	82 0.794%
Tuesday. Feb 21, 2023. 11PM	Fixed one table to show type used for ode when it failed also.	10,330	1086 10.51%	82 0.794%
Tuesday. Feb 21, 2023. 11PM	Minor cleanup.	10,330	1089 10.54%	81 0.784%
Friday. Feb 17, 2023. 9 AM	More fixes to separable solver due to changes made in how it handles explicit vs. implicit choice. Added new table showing ODE's solved by factoring. Now there are 34 such ode's. Improved solution from Laplace to handle undefined in piecewise result.	10,330	1087 10.523%	85 0.823%
Saturday. Feb 11, 2023. 9 AM	Improved separable solver. Now selects the solution either explicit or implicit by veifying it first. This resulted in about 10 more problems being verified OK by Maple.	10,334	1085 10.499%	91 0.881%
Continued on next page				

Table1.1 – Change history. Continued from previous page

Friday. Feb 10, 2023. 11 PM	<p>Added few more problems from Cohen book.</p> <p>Added logic to factor the ode if possible when the original ode form produced no solutions. Needed to do this after trying the original form of the ode as is, else it can make some solvable ode's not solvable any more (exact ode's for example, Euler form for example). For an example, an exact ode if can be factored, the new factors no longer can be exact.</p> <p>Also improved separable to try isolate() as well as solve() to solve explicitly for <math>y(x)</math> before giving up and using implicit solution. This resulted in few more problems now being verified as isolate() can generate sometimes solution without RootOf compared to solve.</p>	10,334	1089 10.538%	97 0.939%
Wed. Jan 4, 2023. 4 PM	Fixed some of Kamke problems, added book problem number also to make it easier to locate the problem in the book. Only for chapter 6.	10,321	1098 10.638%	95 0.9204%
Sunday. Jan 1, 2023. 2 PM	FULL BUILD. add more problems from Cohen book. Added support for detecting and solving second order linear ode which is exact by reducing it to first order.	10,320	1097 10.6298%	95 0.9205%
Wed. Dec 14, 2022. 8 PM	FULL BUILD. Fixed labels on the phase diagram for second order. some regression need to find.	10,247	1087 10.608%	96 0.937%
Sunday Dec 11, 2022. 8 PM	Add few more problems from Cohen book	10,247	1083 10.569%	93 0.9076%
wed Dec 7, 2022. 11 PM	Add few more problems from Cohen book	10,220	1084 10.6067%	93 0.91%
Tuesday Dec 6, 2022. 9 PM	Add few more problems from Cohen book, and new table for exact odes solved by inspection.	10,204	1082 10.6037%	93 0.9114%
Monday Dec 5, 2022. 1 PM	Add function to exact solver to try few integration factors by inspection. see Cohen book, page 23. This results in 40 more odes's now being solved.	10,184	1080 10.6049%	93 0.9131%
Sat Dec 3, 2022. 11 PM	Did full build. added more problems from elementary treatise on differential equations by Abraham Cohen. improved exact solver for 1st order ode.	10,184	1120 10.9976%	92 0.9034%
Tuesday Nov 29, 2022. 11 AM	Did full build after making minor changes.	10,151	1120 11.0339%	99 0.9753%

Continued on next page

Table1.1 – Change history. Continued from previous page

Sunday Nov 28, 2022. 10 AM	Added more problems from An elementary treatise on differential equations by Abraham Cohen. Did full build.	10,151	1119 11.0235%	96 0.9457%
Thursday Nov 24, 2022. 2 AM	Added new book An elementary treatise on differential equations by Abraham Cohen. DC heath publishers. 1906. Added new table that shows ode's solved using implicit solution.	10,137	1119 11.0387%	96 0.947%
Monday Nov 21, 2022. 2 PM	Added routine to convert implicit to explicit at the very end when possible.	10,106	1118 11.06273%	99 0.9796%
Sat. Nov 19, 2022. 1 PM	Fixed few things in separable solver.	10,106	1120 11.0825%	103 1.0192%
Saturday. Nov 5, 2022. 9 PM	<p>Been busy writing paper for arxiv on the kovacic algorithm showing my implemenation which I had in my solver for more than one year now. But it was all new implemenation, cleaning up few things in the process and removed all the latex from it as not needed. It turned out to be 1600 lines only in total. I used better way to find coefficients of Laurent series than I was using before.</p> <p>Cleaned minor problem in solving for initial conditions and did full rebuild. My goal is to be able to verify all the ode's left not verified. But some of these do not verify because Maple's odetest itself fails to verify my solutions, even though the solutions are correct and many match Maple's own solution (those in series solution).</p> <p>There are still class of problems this solver can't solve. These are the ones which current methods implemented can't solve. For these I really need to learn and implement Lie symmetry group for solving ODE's which I have small note here about. This will be the ultimate goal. But this would take long time to do (1-2 years may be) as it is hard subject to learn. This is what Maple uses to solve these hard ode's this solver can't solve.</p>	10,107	1120	107
Tuesday. Oct 14, 2022. 10 PM	No new problems. Added new type for second order ode called <code>second_order_ode_can_be_made_integrable</code> which checks if an ode can becomes integrable as is when multiplied by $y'$ .	10,106	1112 11.0034%	109 1.0786%

Continued on next page

Table1.1 – Change history. Continued from previous page

Monday. Oct 10, 2022. 3 PM	No new problems. Cleaned all the string latex concatenation by making each line separate string to avoid maple warnings. This took few days. Added new table which show program solution next to Maple solution for each problem for easier comparison. Did full rebuild.	10,106	1128 11.1617%	104 1.0291%
Friday. Sept 30, 2022. 11 PM	No new problems. Added internal option to solve each ode in all possible ways found. But this will generate a very large book, over 200,000 pages or more. so I kept this option just for testing. This is a good way to find any hidden bugs by solving the same ode in all possible types found. Did full rebuild.	10,106	1128 11.16169%	105 1.03899%
Tuesday. Sept 13, 2022. 10 PM	4 new problems added. fixed minor bug. Full build	10,106	1127	162
Monday. August 29, 2022. 10 PM	No new problems added. Starting major redesign at top level, will take few more days. Updated design document/diagram. Made rebuild to make sure did not break anything so far. OK.	10,102	1132	163
Thursday. August 18, 2022. 6 PM	Added support for solving what Maple calls homogeneous, class C first order ode's. This managed to reduce the number of unsolved odes by 9. Added more problems from Earl D. Rainville, Phillip E. Bedient. Macmilliam Publishing Co. NY. 8th edition.	10,102	1135	171
Sat. August 13, 2022. 9 PM	Added more problems from differential equations. By Earl D. Rainville, Phillip E. Bedient. Macmilliam Publishing Co. NY. 8th edition. 1997. Improved tables formatting for HTML using fixed width tables.	10,068	1144	171
Tuesday August 9, 2022. 8 PM	Added phase plot for all problem where possible. Added new book differential equations. By Earl D. Rainville, Phillip E. Bedient. Macmilliam Publishing Co. NY. 8th edition. 1997. Added new type for first order ode to solve $y' = f(x)e^{a(x)+by} + g(x)$ ode's. Did full rebuild.	10,000	1144	171
Sunday July 31, 2022. 11 PM	bug fixes in new code added for type 22, 23. Added support for Laplace transform method when no initial conditions are given.	9,933	1136	161

Continued on next page

Table1.1 – Change history. Continued from previous page

Friday July 28, 2022. 9 PM	Added more problems from Elementary differential equations. By Earl D. Rainville, Phillip E. Bedient. Macmilliam Publishing Co. NY. 6th edition. 1981. Added new method to solve first order ode by detecting complete differentials. This simplifies many solutions that before would have taken much longer to solve. But it is not easy to detect complete differentials when solving this by hand. Also added better method to solve nonlinear second order ode's with missing independent variable. Called it type 22. Add better method to solve missing dependent variable for second order. Called it type 23.	9933	1175	159
Tuesday July 26, 2022. 10 PM	Added more problems from Elementary differential equations. By Earl D. Rainville, Phillip E. Bedient. Macmilliam Publishing Co. NY. 6th edition. 1981.	9867	1168	158
Monday July 25, 2022. 11 PM	Added new book. Elementary differential equations. By Earl D. Rainville, Phillip E. Bedient. Macmilliam Publishing Co. NY. 6th edition. 1981. Fixed bug in Bessel ode solver where it was not correctly checking for the form of Bessel in some cases. Need to do Airy ode solver also. Will do that later.	9850	1168	158
Saturday July 23, 2022. 8 PM	Changes to how to verify the solution. Rebuild all Mathematica solutions to improve the latex. ALso added Bessel ODE solver to solve second order odes'. This also converts if possible a second order ode to Bessel ODE form. It uses Bowman 1958 transformation. This is based on this	9836	1151	177
Friday July 14, 2022. 9 PM	Added new first order ode type homogeneous type c to handle ode of form $y' = f(a + bx + cy)^{\frac{1}{n}}$ which produces now better solution than when using d'Alembert since this avoids having to square or raise both sides of the ode to some power. This based on this . Added few more odes.	9836	1226	199
Friday July 8, 2022. 10 AM	Lots of code changes in ODE.mpl, the new object that now represents single ode of all types. Removed dsolver.mpl. Rebuild all Mathematica's result also as new version 13.1 was out. FULL build.	9831	1226	199

Continued on next page

Table1.1 – Change history. Continued from previous page

Friday July 1, 2022. 11 PM	Wrote new module <code>change_of_variable_manager</code> just to handle second order ode transformation and dsolving using these when applicable. Four cases. See this for examples. FULL build.	9831	1233	187
Monday June 20, 2022. 4 PM	changed <code>ode_type</code> to be Object with constructor. Some bug fixes. Add more problems.	9831	1231	219
Friday June 17, 2022. 1 PM	Added more problems from Handbook of exact solutions for ordinary differential equations	9766	1216	216
Wed June 8, 2022. 3 PM	Added more problems from Handbook of exact solutions for ordinary differential equations	9755	1213	216
Tuesday June 7, 2022. 10 AM	Added more problems from Handbook of exact solutions for ordinary differential equations	9740	1205	216
Thursday June 2, 2022. 2 PM	Improve latex	9703	1195	216
Sunday May 29, 2022. 3 PM	No problems added. Improved the Latex display for Mathematica by listing each solution in the list on separate line. Full rebuild for Mathematica now takes 2 days to do. Found bug in Mathematica when using FullSimplify. Posted at stackexchange.	9703	1198	217
Monday May 23, 2022. 6 PM	Added more problems from book Handbook of exact solutions for ordinary differential equations, second edition by Polyanin and Zaitsev.	9703	1198	217
Tuesday May 17, 2022. 10 AM	Added more problems from book Handbook of exact solutions for ordinary differential equations, second edition by Polyanin and Zaitsev.	9395	1126	195
wed May 11, 2022. 11 AM	Added book Handbook of exact solutions for ordinary differential equations, second edition by Polyanin and Zaitsev.	9292	1125	177
Saturday May 7, 2022. 10 AM	More problems from DIFFERENTIAL EQUATIONS with Boundary-Value Problems. by ZILL etall.	9181	1118	173
Thursday May 5, 2022. 4 PM	Added 2 books A course in Ordinary Dierential Equations. by Stephen A. Wirkus, Randall J. Swift. CRC Press NY. 2015. 2nd Edition. and DIFFERENTIAL EQUATIONS with Boundary-Value Problems. DENNIS G. ZILL, WARREN S. WRIGHT, MICHAEL R. CULLEN. Brooks/Cole. Boston, MA. 2013. 8th edition.	9157	1117	173
Continued on next page				

Table1.1 – Change history. Continued from previous page

monday May 2, 2022. 1 PM	Added more problems from Differential Equations: Theory, Technique, and Practice by George Simmons, Steven Krantz. McGraw-Hill NY. 2007. 1st Edition. Fixed a bug in linear system of equations solver. Was not correctly checking for non-linearity. Did not check for $x(t)*y(t)$ case and it was trying to solve this as linear. So I fixed this now and rerun all problems again since my solver now can't handle system of first order ode's which is not linear. These are very hard to solve analytically and few are even possible. So will not support non-linear system of odes. These can be solved numerically.	9044	1102	168
monday April 25, 2022. 1 PM	Added more problems from Differential Equations: Theory, Technique, and Practice by George Simmons, Steven Krantz. McGraw-Hill NY. 2007. 1st Edition. Too many build problem due to large size of latex.	8903	1086	165
monday April 18, 2022. 4 PM	Full build. Removed solving second order ode using series method if all other methods fail, unless explicit hint to use series is given. This reduce the size of the solutions. Made new report from the database just for Mathematica and Maple to better compare their results.	8836	1086	161
Wed April 13, 2022. 3 PM	Added yet more problems from Differential Equations: Theory, Technique, and Practice by George Simmons, Steven Krantz. McGraw-Hill NY. 2007. 1st Edition	8836	944	174
Tuesday April 12, 2022. 11 PM	Have not been working on this for few days. Been busy with CAS integration tests. Added yet more problems from Differential Equations: Theory, Technique, and Practice by George Simmons, Steven Krantz. McGraw-Hill NY. 2007. 1st Edition	8789	944	174
Tuesday April 6, 2022. 6 PM	Added more problems from Differential Equations: Theory, Technique, and Practice by George Simmons, Steven Krantz. McGraw-Hill NY. 2007. 1st Edition	8769	944	174
Tuesday April 5, 2022. 4 PM	Added more problems from Differential Equations: Theory, Technique, and Practice by George Simmons, Steven Krantz. McGraw-Hill NY. 2007. 1st Edition	8736	943	173
Continued on next page				

Table1.1 – Change history. Continued from previous page

Wed March 30, 2022. 6 PM	Added more problems from Differential Equations: Theory, Technique, and Practice by George Simmons, Steven Krantz. McGraw-Hill NY. 2007. 1st Edition	8687	943	173
Thursday March 24, 2022. 7 PM	Improved Latex for trace. Rebuild some ode's. No functionality added.	8648	942	173
Monday March 21, 2022. 10 PM	Completed adding all Kamke book. Lots of Latex build problem due to large size of book.	8648	947	172
Thursday March 10, 2022. 10 AM	Add most of Kamke book ode's. (1850). Only about 200 left. Added leafcount and CPU time for Maple's and Mathematica solutions and did full build. lots of ode's I can't solve from this book as many I still do not have solvers for yet.	8564	857	229
Thursday March 3, 2022. 6 PM	Fixed bug in second order ode Laplace method. Added check in linear system of first order ode solver for non autonomous system. Currently I do not have solver for this. Need to add this in the future. I was not checking for this before. This was a problem from Coddington textbook chapter 6. Add more problems from Coddington. Fixed bug in solving for IC when solution was implicit.	6694	185	124
Wed March 2, 2022. 7 PM	Added more problems from Coddington textbook. Change first order solver so that if solving an ode using a hint does not yield a solution, is to try again with no hint.	6680	184	123
Tuesday March. 1, 2022. 9 PM	Improved verification of series solution. This made number of unverified solutions less than before. Added more problems from Coddington textbook.	6652	184	123
Sunday Feb. 27, 2022. 7 AM	Finished refactoring of the application. Added new large diagram of the design which is now more complete, done using VISIO. Added UNIT TEST main call to run all UNIT TESTS for each solver. Changed second order ode solver to try series solution if all other methods fail to find closed form solution.	6621	184	297
Sat Feb. 26, 2022. 11 AM	No added problems, but large refactoring of the application. to improve the overall layout and design. This is taking more time than expected. Still more to do.	6617	218	290

Continued on next page

Table1.1 – Change history. Continued from previous page

Wed Feb. 23, 2022. 2 AM	Added more odes from An introduction to Ordinary Differential equations. Earl A. Coddington. Dover. NY 1961. I do not support series solution for 3rd or higher order ode's. Maybe add it in the future.	6617	217	291
Tuesday Feb. 22, 2022. 3 AM	Added book An introduction to Ordinary Differential equations. Earl A. Coddington. Dover. NY 1961. Fixed bug in higher order ode solver where I did not check for complex conjugate coming in pairs correctly. This only applies to higher order ode's not second order. So remove this for now and just kept the solution as is in terms of complex exponential. Need to fix this better in the future since using sin/cos is more clear than complex exponentials but need to figure a good way to do it for higher order ode's.	6595	215	291
Monday Feb. 21, 2022. 3 PM	Added more problems from 11th edition of Elementary Differential Equations and Boundary Value Problems. Boyce and DiPrima. Higher order ode's chapter added. I still do not support solving higher order ode's with reduction of order. I need to add this functionality sometime. so 5 such problems could not be solved now. But all the rest were solved OK.	6501	215	291
Sunday Feb. 20, 2022. 5 PM	Added new book. 11th edition of Elementary Differential Equations and Boundary Value Problems. Boyce and DiPrima. I have the 10th edition in there already. Laplace chapter Added. Improved some latex for Kovacic algorithm and fixed couple of small bugs.	6457	210	291
Sunday Feb. 20, 2022. 10 AM	Added short description of Kovacic algorithm section. Added diagrams for each case. Added new section for problems from the three papers related to this algorithm so easy to find.	6444	210	291
Tuesday Feb. 15, 2022. 11 AM	Imprved Latex, simplified.	6434	210	292
Continued on next page				

Table1.1 – Change history. Continued from previous page

Sunday Feb. 13, 2022. midnight	Finished case 3 of original Kovacic algorithm. Now Latex shows all the steps. Added section 2 in the chapter for Kovacic which solves same ode using all cases $n = 1, 2, 4, 6, 12$ in order to compare the different algorithms on the same ode. Now there is only 9 problems in section 2. Still need to clean the Latex more and do more clean up of the Latex. Removed few duplicate ode entries I found.	6434	210	292
Thursday Feb. 10, 2022. 3 PM	Added steps for case 2 of Kovacic algorithm. Most of the main steps Latex is now there. This is based on original algorithm. Not the modified one. Split the kovacic package to 3 separates ones. One for each case.	6441	210	291
Tuesday Feb. 8, 2022. 4 PM	For second order ode's, added new function to convert solutions where the basis functions are complex exponentials to convert the solution to use sin/cos with possible damping term to make the solution easier to read and match textbook more. This only applies to linear second order ode's. It also improves how the final solution from kovacis algorithm looks using trig functions rather than complex exponentials.	6441	210	291
Monday Feb. 7, 2022. 4 AM	For case 1, for poles of order $\geq 4$ use partial fractions decomposition to find $b$ instead of undetermined coefficients. For order $< 0$ changed to use long division method. Tested and this seems to work OK. Need to do more testing.	6441	210	291
Sunday Feb. 6, 2022. 2 PM	Fixed formatting in Latex, and tables. Added more latex. Still working on case 1 of kovacic algorithm. main steps are now there but need to add little more details. Then will go to implement case 2 next week. This implemenation is based on original Kovacic paper and not Saunders/Smith modified algorithm.	6441	210	291
Sat. Feb. 5, 2022. 4 PM	Fixed labeles in tables. Added a check for ode $z'' = rz$ in Kovacic algorithm on $r$ if do not depend on $x$ , then no need to run Kovacic algorithm as solution is obvious. So this way it shortened the solution. Only do the algorithm if $r$ is rational function of $x$ .	6441	210	291

Continued on next page

Table1.1 – Change history. Continued from previous page

Friday Feb. 4, 2022. 5 PM	Full build. Added more information in tables for kovacic that shows pole orders and order at infinity in addition to case used and all cases found. This will help in testing also.	6441	210	291
Wed Feb. 2, 2022. 3 PM	Improved Latex, simplified some steps that were generating large output. Still in case 1 of kovacic algorithm. Made diagram.	6441	211	292
Tuesday Feb. 1, 2022. 4 PM	Finished adding all main steps to case one algorithm of kovacic solver. I need to add diagram also. But now all main steps are displayed. Will start on case 2 later this week. Case 2 is actually easier than case 1. My kovacis package now is now at about 2,600 lines of code due to Latex added. It will probably double in size before all three cases are finished.	6441	211	292
Monday. Jan. 31, 2022. 3 PM	Started to add Latex showing steps of Kovacis algorithm. Currently working on case one only. May be by end of the week will start on case 2.	6441	211	292
Wed. Jan. 26, 2022. 3 PM	Wrote new version of Kovacic algorithm based on original paper for case 1. Still need to do case 2 and 3.	6441	211	292
Friday Jan. 21, 2022. 11 PM	More testing of kovacic algorithm. Improved simplification of intermediate results. Not able to find ode which fail case 1 and case 2 but works with case 3, either $n = 4, 6, 12$ . Problems from paper seem to have typo. They do not work as claimed.	6441	211	292
Thu Jan. 20, 2022. 5 PM	update kovacic table to indicate which case number was used to solve the ode. rebuild all.	6440	213	292
Wed Jan. 19, 2022. 1 PM	Changed step 3 in kovacic algorithm so that for $n = 1$ and $n = 2$ it now follows original paper by Kovacic and not Smith paper. Case 3 remains the same. I still need to add the step by step but waiting to make sure first the implementation is correct.	6440	212	292
Tuesday Jan. 18, 2022. 8 PM	Changed few ode for Kovacic which did not have rational coefficients. Need to improve my detection on this and reject such odes. Will do that next.	6440	212	292

Continued on next page

Table1.1 – Change history. Continued from previous page

Monday Jan. 17, 2022. 10 PM	rebuild all kovacis problems. Changed two problems in the kovacic collection odes not to use parameters. The problem is that in kovacic algorithm it needs to decide if $d > 0$ and having unknown parameter makes it not possible to decide without assumption. And example is Bessel ode. Where it gives Liovilian solution only for $n$ being half odd integers. So for now, will only support kovacic ode's that contain no unknown parameters.	6440	212	292
Sunday Jan. 16, 2022. 10 PM	Improved handling of poles for second order in kovacic algorithm.	6434	214	292
Sat Jan. 15, 2022. 11 PM	Just a rebuild. overlooked running over some ode's again last time after the fix. do not know how this happened. Also, for the second kovacis solution, if integration results in special function, kept the integral Inert. This also prevents problems Maple has with verification of these solutions, it also now agrees with Mapel's <code>DEtools:-kovaciccols</code> . This now made the number of unverified solutions back to where it was before adding all the 840 ode. I still need to resolve the issue when few are not solved. All of these are in case 3, which takes very long time to complete.	6434	234	292
Sat Jan. 15, 2022. 6 AM	Fixed bug in step 3 of kovacic algorithm. There are still few ode's that do not get solved using kovacic algorithm even though they should. I still need to find out why. It is possible I've made some mistake in the implementation from papers I am looking at.	6434	240	315
Continued on next page				

Table1.1 – Change history. Continued from previous page

Friday Jan. 14, 2022. 10 AM	Added verification on $\omega$ solution in step 3 of kovacic algorithm that is satisfies $w' + w^2 = r$ . There are cases where solution $w$ was obtained but it does not satisfy this riccati ode. Hence reject if this happens. This explains why I was getting some solved solutions that did not verify in the last build. Added about 840 problems in new chapter called kovacic collection of problem to solve these are ode's solved using only the kovacic algorithm (using 'hint'="kovacic" option). This is for testing purposes. These problems are collected from the rest of the database which are all solved already using other methods (series, etc...) but can also be solvable using kovacic algorithm if requested. The use of 'hint'="kovacic" forces the solver to only try kovacic algorithm solver and no other. This will now make the full build to take more time.	6434	266	315
Wed Jan. 12, 2022. 5 AM	Fixed another bug in kovacic algorithm. Generating the s sequences was not correct. But need to find why some are not verified now.	5598	206	298
Tuesday Jan. 11, 2022. 5 PM	Fixed bug in kovacic algorithm. Also changed it to use solve(identity) to find the coefficients of the polynomial in step 3. This is much better.	5598	215	292
Tuesday Jan. 11, 2022. 11 AM	Full build. regression. 3 integrals fail now compared to last build. Need to find why	5598	213	296
Sunday Jan. 9, 2022. 9 PM	Minor bug fix. Refactor code in kovacic module.	5598	210	296
Sunday Jan. 9, 2022. 6 AM	Fixed bug in my kovacic alogrithm implementation. Need to add more tests.	5598	211	296
Friday Jan. 7 2022. 6 AM	Finally completed Kovacic algorithm but still need to add the latex showing the steps and need to test it more. 23 more ode's now can be solved. But 4 seem to not have been validated. So need to find why.	5598	223	296
Thursday Dec. 29 2021. 11 PM	full build. Added more problems from Makarets and Reshenyak book.	5598	246	292
Tuesday Dec. 28 2021. 5 AM	full build. changes to dAlembert solver. Removed 2 problems not useful and were slow to verify by Maple.	5584	246	292

Continued on next page

Table1.1 – Change history. Continued from previous page

sunday Dec. 26 2021. 9 PM	Fixed linear fractional ode solver (called polynomial type), so it can handle missing $x$ or $y(x)$ in the numerator or denominator. Added more problems from Makarets and Reshenyak book. Need to handle what is called "Homogeneous ODEs of Class D" in Maple. Currently do not have solver for this. see problem 34, page 16 in Makarets and Reshenyak book as an example. book claims this is linear fractional ode, but do not see how this is the case so it was not detected. Improved polynomial type first order ode detection part.	5586	250	291
sunday Dec. 26 2021. 2 AM	Added more problem from Makarets and Reshenyak book. Fixed bug in first order initial condition which determines the constant of integration. Changed to limit instead of eval to avoid 1/0 problem.	5574	249	290
sat Dec. 25 2021. 1 PM	Fixed a bug in Liouville ode (type 18) solver. When it can't integrate, do not call separable solver. This fixed two solutions. Adjusted type 17 solver to reject ode with rhs that depends on the independent variable. Can't solve when this is the case.	5547	248	290
Friday Dec. 24 2021. 12noon	some bug fixed	5547	248	292
Thursday Dec. 23 2021. 9AM	added few more problems from Makarets and Reshenyak book.	5547	249	297
Wed Dec. 22 2021. 10 PM	added few more problems from Theory of differential equations in engineering and mechanics by K.T. Chau. to test Liouville transformation. Book has some typos in the problem section, so two new problems could not be solved using this transformation as expected. Did full build.	5490	243	297
Tuesday Dec. 21 2021. 10 PM	Completed Liouville ode solver. Added Liouville transformation. This is for ode of form $y'' + B(x)y' + C(x)y = 0$ where transformation $y(x) = u(x)e^{\frac{-1}{2} \int B(x) dx}$ makes a new ode $u'' + Q(x)u = 0$ that could possibly be solvable now. Did full build.	5483	240	298
Monday Dec. 20 2021. 10 PM	Added solver for new second order type. Liouville ode of form $y'' + f(x)y'(x) + g(y)(y')^2 = 0$ . But need to add more LaTeX still. Added few problems. Improved isobaric and homogeneous first order detection. Added more unit test to isobatic and homogeneous first order odes.	5481	242	296

Continued on next page

Table1.1 – Change history. Continued from previous page

Thursday Dec. 16 2021. 3 PM	Rewrote how homogeneous first order type is detected. Also improved the isobaric ode detection. Made the code into a Object and added unit tests. This made it easier to use. Rerun all the ode's of these types. Also did full build for Mathematica version 13 results since it was released now. Maple is now at version 2021.2. Found a bug in Maple using solve.	5475	242	294
Sunday dec 12, 2021. 11 AM	improved more than handling of first order ode factoring. Added few more test problem. Did full build. This resulted in 2 more problems now solved.	5475	243	294
Friday dec 10, 2021. 10 AM	Fixed regression in last build rolled back the handling of first order ode. Now do only factor and look for $y(x)$ in the left side if the result is of type *. Do not accept result if result is rational expression. This fixed 5 results which were not versified in last build.	5472	245	294
Friday dec 10, 2021. 1 AM	Full build. In first order, added 2 checks to see if the ode can be broken into product equal to zero. If so, solve each part separately. simplifies things. use <code>factor</code> and <code>collect(ode,y(x))</code> and check if result is *. Need to go over the result more as I see 5 problems now do not verify. seems like regression.	5472	245	299
Wed dec 8, 2021. 3 PM	Full build. Added check for first ode to handle solution $y = 0$ . For example when input is $yy' + y = 0$ , before it was just giving solution to $y' + 1 = 0$ and over looking $y = 0$ . Fixed type 17 handling. Do not use particular and homogeneous solution on it. Does not work. Instead, just solve it as is when converting to first order ode. Now it gives same solutins as Maple. This took 2 days to find and fix and it is much easier method also. Maple keeps hanging on problem 2412 in the script. But when I stop the script, and start it again from 2412, it works. I have no idea why.	5472	246	294

Continued on next page

Table1.1 – Change history. Continued from previous page

Sunday dec 5, 2021. 7 AM	Added more problems. Working on adding Liouville ode pattern (not to be confused with eigenvalue boundary value problems with the name Sturm-Liouville which this program does not handle now). These are odes of the form $y'' + f(x)y' + F(y)(y')^2 = 0$ . Currently the program does not detect these and can not solve them. I hope to add this new type soon.	5472	249	292
Sat dec 4, 2021. 8 AM	Add new transformation (called it type 17) for reduction of order by tranforming the dependent variable. This is for second order ode of the form $f_1(y)(y'')^n + f_2(y)(y')^m = F(x)$ .	5453	240	292
Friday Dec 2 2021. 3 PM	Added more problems from new book. THEORY OF DIFFERENTIAL EQUATIONS IN ENGINEERING AND MECHANICS. K.T. CHAU, CRC Press. Boca Raton, FL. 2018. Cleaned the statistic section. Imporved Mathematica's build script. Fixed a bug in second order where kovciac method was being called twice. How did I not see this before?	5436	240	292
Wed Dec 1 2021. 5 AM	Improved how to check for type of expansion point using series method. Used Maple to check if the series expansion of coefficient is of type taylor instead of how I did it before, which was to check if limit exist. Added new Table which shows all problems not solved by this program and Maple. These are now counted as solved, as these problem can't be solved using series method.	5394	236	292
Tuesday Nov 30 2021. 7 PM	Fixed series solver for first order and second order. When the RHS is not analytic at expansion point, do not solve as it needs asymptotic analysis which I did not implement yet. Before the program did not check the RHS correctly. Changed accounting so that if a problem was not solved but also not solved by Maple, it is now counted as solved as it means problem has no known solution.	5394	245	285

Continued on next page

Table1.1 – Change history. Continued from previous page

Monday Nov 29 2021. 1 AM	Added Mathematica solutions to compare against in addition to Maple. Added few problems for series solution when RHS is not analytic at the expansion point. I need to fix a bug I found in this yet. May be this week will be done. When the RHS is not analytic at expansion point, do not solve.	5390	326	291
Tuesday Nov 23 2021. 11 PM	Fixed yet another bug for supporting higher degree second order odes. Did not normal the ode in one place before the call. Still Need to add more test cases. Moved the build from worksheet to command line. It is much faster now. Takes only 5 hrs instead of 2 days.	5386	326	288
Monday Nov 22 2021. 4 AM	Fixed another bug for supporting higher degree second order odes. Was not handling symbolic exponents right. I think it is all now working OK. Need to add more test cases.	5386	326	288
Sunday Nov 21 2021. 8 PM	Fixes for supporting higher degree second order odes	5386	328	288
Sat Nov 20 2021. 3 AM	Added support to solve second order odes with degree not 1. Before only degree 1 could be solved	5386	333	288
Sat Nov 20 2021. 11 AM	Add more problems in my own section for enumeration of first order odes. Full build now takes 2 days to complete.	5386	338	288
Thur nov 18 2021. 6 AM	Add more problems in my own section for mainly testing by starting to enumerate all possible forms of odes. Will take much more time to complete. Cleaned the tables generated for better Latex formating.	5333	329	287
Tuesday nov 16 2021. 1 AM	Replaced signum that shows up in few places by 1 by adding assumptions. Cleaned the verification code. Change solution that has heaviside to use piecewise. Changed lots of Latex to use breqn package	5292	325	286
Sat nov 13 2021. 4 AM	Add support for Lagrange adjoint equation method. Added few more problems	5292	326	289
Thu nov 11 2021. 5 AM	Added new book Ordinary differential equations and calculus of variations. Makarets and Reshetnyak and few problems from it	5277	320	287
Thu nov 11 2021. 3 AM	Added new transformation on independent variable to solve second order ode (type 15). see here for examples	5265	315	225

Continued on next page

Table1.1 – Change history. Continued from previous page

Tue nov 8 2021. 9 PM	added support for using integrating factor to solve second order ode of the form $y'' + p(x)y' + (p(x)^2 + p'(x))y = f(x)$	5265	318	223
Monday nov 8 2021. 2 AM	Added more problems from (KREYSZIG, ADVANCED ENGINEERING MATHEMATICS) mostly Laplace	5260	318	223
Sunday nov 7 2021. 7 PM	Added more Laplace problems from KREYSZIG book. Added support for solving ode with shifted data using Laplace method. This is where initial conditions are not at $t = 0$ .	5240	318	223
Sunday nov 7 2021. 1 AM	Added more problems from (KREYSZIG, ADVANCED ENGINEERING MATHEMATICS), series and Laplace. Added Table showing ODE's solved using Laplace. Fixed a bug in linear systems Latex display	5229	318	223
Friday Nov 5,2021 1 AM	Added new book (KREYSZIG, ADVANCED ENGINEERING MATHEMATICS) and some problems from it (series). Also Added count of problems for tables also. Fixed small bug in first order series.	5207	318	217
Thursday Nov 4,2021 10 PM	simplify integrals with $\exp/\ln$ in reduction of order solver	5167	318	210
Thursday Nov 4,2021 4 AM	changed reduction of order solver to use formula $y_2(x) = y_1(x) \int \frac{e^{-\int p dx}}{y_1^2} dx$ instead of how I did it before, which is by full derivation each time. This is much simpler.	5167	318	210
Thu nov 4 2021. 3 AM	cleaned riccati solver.	5166	307	223
Monday nov 1 2021. 11 PM	added more problems	5166	307	223
Monday nov 1 2021. 1 AM	added more problems	5098	289	207
Sunday oct 31 2021. 9 AM	added complex roots for indicial. This is the final act in series solution for second order.	5082	286	203
Sat. oct 30 2021. 4 PM	added more problems	5082	300	189
Friday oct 29 2021. 1 AM	Fixed another bug in coefficient to series conversion	5039	298	183
Thu oct 29 2021. 1 AM	added more problems, Fixed bug is coefficient to series conversion	5039	300	182
Thu. oct 28 2021. 3 AM	added more problems, change layout of document, fixed labels of ode's	5005	293	174
Tuesday oct 28 2021. 1 AM	added more problems	4921	285	149

Continued on next page

Table1.1 – Change history. Continued from previous page

Wed oct 27 2021. 11 PM	Change all the latex to use breqn with tex4ht as well.	4918	284	147
Tuesday oct 26 2021. 7 AM	added more problems	4917	283	148
Tuesday oct 26 2021. 6 AM	added more problems	4909	280	145
Tuesday oct 26 2021. 1 AM	added more problems and fixed bug in generating series	4883	280	142
Monday oct 25 2021. 5 PM	added more problems	4857	281	125
Monday oct 25 2021. 1 PM	added more problems	4812	281	88
Monday oct 25 2021. 9 AM	Clean latex	4774	281	82
Sunday oct 24 2021. 11 PM	fixed bug. One off in series order	4774	281	82
Sunday oct 24 2021. 7 AM	fixed latex bugs	4774	288	88
Sat oct 23 2021. 9 PM	fixed bug in finding particular solution for series solver	4774	287	89
Sat oct 23 2021. 10 AM	Fixed few bugs in series solver	4774	281	83
Friday oct 22 2021. 11 PM	Finished all 3 cases for series. Complex root for indicial equation is left to do.	4774	288	78
Friday oct 22 2021. 3 PM	small fix. I was making the log term case of the above as solved by mistake.	4774	298	71
Friday oct 22 2021. 8 AM	fixed bug in series solver	4774	283	71
Friday oct 22 2021. 4 AM	add code for roots of indicial eq. differ by integer, case where log term is not needed. Series solver.	4774	294	74
Tuesday oct 19 2021. 5 PM	lots of Latex changes. Switched to breqn for PDF	4760	314	70
Monday oct 18 2021. 5 AM	working on series solver.	4760	314	70
Sunday oct 17 2021. 11 PM	working on series solver and adding problems	4724	312	66
Friday oct 15 2021. 4 AM	working on series solver and adding problems	4724	312	68
Thu oct 14 2021.	fixed latex/polynomial formating, series solver.	4724	312	68
Thu oct 14 2021. 7 AM	fixed bug. but now few do not verify more, due to polynomial issue. series solver.	4724	312	64
Wed oct 13 2021. 7 PM	regression. need to fix. Series solver	4724	326	54

Continued on next page

Table1.1 – Change history. Continued from previous page

Monday oct 12 2021. 10 AM	added repeated roots for frobenius series. Regression	4722	309	82
Monday oct 11 2021. 4 AM	fixed bugs in frobenius series for first order ode solver	4716	325	48
Monday oct 11 2021. 1 AM	added frobenius series for first order ode	4716	325	50
Thu oct 7 2021. 5 AM	added particular solution for frobenius se- ries. regression	4692	315	91
Wed oct 6 2021. 5 AM	add more inhomogenous regular points. se- ries solver. Still need to add the inhomoge- mous case.	4673	309	49
Monday oct 4 2021. 9 PM	Fixed bug in roots for indicial equation.	4673	308	50
Monday oct 4 2021. 3 PM	. added frobenius, but one case only. But have regression	4673	308	81
Fri oct 1 2021. 6 PM	No new code added. Added more problems only	4673	320	48
Fri oct 1 2021. 5 AM	. Fixed series bug, which affected new ode added.	4649	320	48
Fri oct 1 2021. 1 AM.	just code cleaning. Latex clean up. no new functionality	4673	320	48
Tuesday sept 28 2021. 8 AM	more fixed in series solver. REGRESSION happened. Need to fix later	4673	320	68
Monday sept 27 2021. 4 PM	regression. Changed MAX TERMS.	4637	322	111
Thu sept 23 2021. 11PM	Fixed below. still something is broke. I found why. I used to try series method on those ODEs that I can't solve exactly. I re- moved this from the code. That is why the not solved increased.	4495	276	47
Thu sept 23 2021. 7PM	made FULL BUILD	4495	258	40
Sunday sept 19 2021. 11 AM	started on series solver	4409	253	39
Monday sept 13 2021 2 pm	Added series method for ordinary point, when all other methods for second order do not work	4371	245	48
Sunday august 24 2021. 9 pm	Added laplace method to solve linear odes	4270	257	38
Thu march 11 2021. 10 PM	Full build	3944	257	14
Tue jan 19, 2021 4 PM	odetest ON, improved simplification	3769	215	9

Continued on next page

Table1.1 – Change history. Continued from previous page

Sunday jan 18, 2021 2 PM	odetest ON, Fixed solve bugs, ALso changes all to simplify(size). need to rerun all	3769	220	13
Sunday jan 17, 2021 10 AM	odetest ON, Fixed some bugs in check solution	3769	215	15
Sunday jan 17, 2021 6 AM	odetest ON, added more options to check solution	3769	215	20
Sat jan 16, 2021 10 AM	(turned off odetest and moved product check ABOVE)	3769	395	87
Wed jan 14, 2021 5 pm	switched back to using ONE ode type to solve instead of all, was taking too long to build.	3769	228	25
Mon jan 11, 2021 9 AM	changed assuming to same line as odetest	3769	219	19
Wed Dec 16, 2020 5 AM	removed 2 problem which keep long time and Maple does not timeout	3621	246	22
Monday Dec 14, 2020 7 PM	after full rebuild for better latex	3604	246	22
Sat Dec 6, 2020 NOON	Major rewrite. Removed OOP and used just types instead	3514	245	23
Wed Nov 25, 2020 6 AM	added kovacic for inhomogeneous ode	3478	247	22
Tuesday Nov 24, 2020 11 PM	fixed riccati. removed abs.	3469	247	22
Sat Nov 21, 2020 2 PM	improved dAlemebert solver	3466	247	25
Nov 11, 2020 5 AM	added kovacic tranformation only which helped solve few odes that were not solved before	3367	245	28
Oct 27, 2020 6 PM	started adding eigenvalues/eigenvectors	3267	266	31
Oct 27, 2020 7 AM	changed constants of integration, lots of bugs fixed	3266	266	30
Oct 18, 2020 5 AM	spend all day fixing bug which caused this difference	3126	266	32
August 7, 2020 10 PM	add second order ODE with varying coeff, special case	2517	204	29
August 5, 2020 1 PM	changes to dAlembert solver	2515	205	29
july 25, 2020 1 AM	moved all input to use sqlite DB instead of plain text file	2385	200	27
July 17, 2020 11 AM	after fixing bug in exact solver	2316	194	4
july 13, 2020 11 PM	fixed detection of homogeneous ode	2280	226	5

Continued on next page

Table1.1 – Change history. Continued from previous page

July 13, 2020 9 AM	rewrote dAlembert solver	2280	233	5
July 10, 2020 12:30 PM	improvement in verify due to use <code>__C1</code> instead of <code>C[1]</code>	2266	235	5
July 6, 2020 1 PM	Fixed <code>isobaric =&gt;separable</code> <code>symbolify(symbolic)</code>	2197	234	10
July 5, 2020 4 AM	stil broke something in dAlembert. Need to fix	2196	273	9
July 5, 2020 3 AM	Broke something in dAlembert	2196	276	9
July 2, 2020 11 AM	this regression due to the homogeneous solver. Took out the <code>simplify symbolic</code> . put it back.	2200	325	9
July 2, 2020 3 AM	build	2201	305	9
June 29, 2020 11 AM	changes to handle <code>A*B</code> case	2200	328	13
June 23, 2020 8 AM	build	2201	285	47
July 2018	started	1	0	0
